

Dear Make A difference,

It is my pleasure to write this letter concerning different aspects in my life. One day when I was in my dorp I had a dream. That dream explained a half of my future life. I dreamt that one day there will be a certain institution that would support me in my education and my life in general and so it was. MAD has really made a difference in my life.

First, I would like to talk about how MAD has helped me in my life. Mad has greatly helped me in different aspects in my life. MAD has mostly helped me in my Education. Having Education is like having a second God exception of the Almighty God who keeps us alive. I remember when I was in my dorp I used to study in Soaliki medium school (Government school) which had no enough teachers and the teachers who were there, didn't teach me well. But MAD brought me in English medium school where I learned many things and English language.

Also MAD has provided me with parental care! Madam Theresa really gives me parental care. She is now my mum!!!

MAD has also purged me. It has greatly improve my health situation. I had a certain disease but Madam Theresa took me to hospital where I got medical treatment and now that disease is about to disappear. That disease is called Vitiligo.

In my opinion I think there is a high need and it's very important to help other orphans. Since Tanzania is among the developing countries (third world country) there is a need to help orphans and street children so as they can have good life. Some suffer because of HIV/AIDS pandemic and thus; they need high care and help in their education and provision of basic needs. After helping the orphans and street children I think they can all make a difference in the world!!

My ambition is to be a doctor. This is because I can overcome the science subjects that is Physics, chemistry, Biology and also Mathematics. I am sure that I can also be a engineer (mainly Mechanical Engineer), also I can be a pilot (PGM) because I always perform
