

→ Make A Difference has brighten my life and raised my awareness in coping with every step in my life. Under mama Theresa, I get good education which many children in Tanzania do not get. Together with my education, make A Difference, highly provides me with all the necessities in my day to day life. I get food, clothes, good housing and other social needs, ~~and~~ accessibilities and skills which build me in good and positive attitude to realize ^{my} potentials and my importance to other people.

With this good education, I dream of becoming an **ENGINEER** after my studies. I'll highly aim at helping those who are in need and brighten their abilities towards making a difference in the world. I will love to help others with the education that I get.

Many orphans in Tanzania lack the basic needs in their lives. They live in hard conditions and they are un-knowledgeable hence lead to poor management of their lives. This situation undermines the abilities and capabilities in them along with disorganizing their future and dreams. Lack of support encourage the concerned children to engage themselves in bad practices and risk behaviour which may utterly destroy their morals and endanger their lives. Big changes would happen if these children are helped as I am helped. Helping them would revive the potentials in them and give them good chance to made difference in the **WORLD**.
